TALORCRAFT FLYING CLUB

History

In 1936 Clarence Gilbert Taylor moved to Alliance, Ohio to form the Taylorcraft Corporation. He began to manufacture the first successful side by side light aircraft, the Taylorcraft. By the early 1940's the Taylorcraft Corporation was the largest employer in Alliance with over 1800 employees.

During 1936, the first year of production in Alliance Mr. Taylor presented to his employees a new Taylorcraft airplane. This was the first airplane of the new formed Flying Club. The Taylorcraft Flying Club is the oldest continuous flying club in the United States. The Taylorcraft Flying Club continues to thrive and prosper, long beyond the life of the Taylorcraft Corporation itself, because it continues to have conscientious members who are dedicated to safe and economical flying.

Club

Taylorcraft is a small flying club based at Tri-City Airport (3G6) near Sebring in northeast Ohio. The airport is convenient to the cities of Alliance, Canton, Louisville, Salem and others. TriCity a class G airport provides a challenging yet safe environment. The airport is not crowded with airline operations, which also makes it an economical flying base.

Our Flying Club is Incorporated and operated by its board and members. Each member takes pride in the operation, maintenance and general condition of the aircraft. Our goals are to provide affordable, safe flying with a fun camaraderie atmosphere promoting aviation. In addition, we hope to also provide an environment where members may be able to stimulate their knowledge, increase their proficiency and encourage an interest to new pilots in the world of general aviation.

We have a member that is a CFII and is available for check-outs and Bi-annuals. The club also has a on-line scheduling system and the airplane maintain by a members with military experience working alongside a local IA to keep the airplane in excellent condition.

Aircraft

N30852

TFC currently has a Cessna Cardinal 177B. The Cardinal is a safe and efficient airplane that you will enjoy flying as the Cardinal is a great cross-country airplane. It is IFR certified with a new Garmin panel and overlays updated in fall of 2014 with the following : Garmin 340 audio, Garmin GTN 650 WAAS GPS, and GI 106A CDI and a Garmin 327 Transponder, and a Garmin GMC 250XL GPS moving map.

Aircraft Performance Data

Cruise - 121 Knots
Stall - 46 Knots
Range 417 Nautical Miles
Fuel 50 Gallons
Useful Load 936 Lbs
Takeoff Normal - 750 ft
Landing Normal - 600 ft.
